## PROFILE

<b>Research</b>	Engineering systems design. Design for changing requirements. Concurrent engineering. Multidisciplinary design optimization. Applied optimization research.
<b>Technical</b>	
ENGINEERING SYSTEMS DESIGN:	<ul style="list-style-type: none"><li>- Design for flexibility and robustness</li><li>- Change propagation analysis</li><li>- Reliability and uncertainty quantification (Monte-Carlo with importance sampling)</li></ul>
MODELING AND SIMULATION:	<ul style="list-style-type: none"><li>- Finite element methods (thermomechanical, structural)</li><li>- Agent-based methods</li><li>- System dynamics models</li></ul>
OPTIMIZATION:	<ul style="list-style-type: none"><li>- Blackbox and derivative-free optimization (Mesh-adaptive direct search)</li><li>- Multidisciplinary optimization (Non-hierarchical analytical target cascading)</li><li>- Stochastic blackbox optimization</li></ul>
MACHINE LEARNING:	<ul style="list-style-type: none"><li>- Deep learning, Long-short term memory (LSTM)</li><li>- Reinforcement learning (Actor-critic methods)</li><li>- Hyperparameter optimization</li></ul>
<b>Software</b>	MATLAB and Simulink, Python (PyTorch, matplotlib), C++ (CUDA, OpenMP, Qt) FEA (Abaqus, ANSYS), CAD (SOLIDWORKS, NX Siemens), DAQ (NI LabVIEW)

## EDUCATION

JAN 2017 – DEC 2020	<b>Doctor of Philosophy</b>	<i>McGill University</i>
	Mechanical Engineering , CGPA: 4.00	
CONCENTRATION	Engineering design and optimization	
DISSERTATION	<i>Optimization driven set-based design under uncertain requirements</i>	
AUG 2013 – DEC 2015	<b>Master of Science</b>	<i>Khalifa University</i>
	Mechanical Engineering , CGPA: 4.00	
CONCENTRATION	Instrumentation and photonics	
DISSERTATION	<i>Internal corrosion detection of oil and gas pipelines using fiber optics</i>	
AUG 2009 – JUNE 2013	<b>Bachelor of Science</b>	<i>Khalifa University</i>
	Mechanical Engineering , FIRST CLASS HONOURS, CGPA: 3.97	
CAPSTONE PROJECT	<i>Development of a human operated mobile hexapod platform</i>	

## EXPERIENCE

JAN 2021 – PRESENT	<b>Systems Optimization Lab, McGill University</b>	MONTRÉAL, CANADA
	<i>Postdoctoral Researcher</i>	
	<ul style="list-style-type: none"><li>• Built a stochastic COVID model for predicting the spread of the disease in a population using agent-based approaches and used reinforcement learning algorithms to optimize public health policies.</li><li>• Applied stochastic optimization to hyperparameter optimization problems in machine learning.</li><li>• Advanced the field of stochastic blackbox optimization by co-developing the stochastic version of the mesh-adaptive direct search algorithm.</li><li>• Lectured the engineering systems optimization class and developed MATLAB training modules and projects related to multidisciplinary optimization with applications to aircraft design.</li></ul>	

- |                     |   |                    |
|---------------------|---|--------------------|
| JAN 2017 – JAN 2021 | <b>McGill University</b><br><i>Research assistant</i>   | MONTRÉAL, CANADA   |
|                     | <ul style="list-style-type: none"> <li>• Won a Fonds de Recherche du Québec Nature et Technologie (FRQNT) grant (56,000 CAD).</li> <li>• Developed mathematical frameworks for quantifying design flexibility and robustness.</li> <li>• Developed novel design frameworks for managing uncertain requirements in system and subsystem design through set-based design approaches.</li> <li>• Developed a thermomechanical simulation model for modeling additive manufacturing repair and life extension processes.</li> <li>• Co-developed a novel lifecycle cost model based on system dynamics models.</li> <li>• Used machine learning models to substitute expensive thermomechanical simulations in design studies and developed a variant of kernel smoothing for estimating the sensitivity of design solutions to different requirements (Jacobian formulation).</li> </ul> |                    |
| JAN 2017 – JAN 2020 | <b>GKN Aerospace Engine Systems</b><br><i>Visiting researcher</i>   | TROLHÄTTAN, SWEDEN |
|                     | <ul style="list-style-type: none"> <li>• Participated in a technology transfer to translate my research into industrial practice.</li> <li>• Provided training modules and workshops to GKN engineers on set-based design and optimization (MATLAB and Python).</li> <li>• Collected information about industrial workflows to guide academic research.</li> </ul>  |                    |
| JAN 2018 – DEC 2019 | <b>McGill University</b><br><i>Teaching assistant</i>   | MONTRÉAL, CANADA   |
|                     | <ul style="list-style-type: none"> <li>• Mechanical lab course – Prepared lab manuals, conducted labs, graded student reports, and incorporated MATLAB programming exercises into the syllabus.</li> <li>• Engineering Professional Practice course – Conducted town halls, hosted guest lecturers, provided feedback to students, and gave several talks about entrepreneurship.</li> </ul>  |                    |
| AUG 2013 – DEC 2016 | <b>Asset Integrity Management Systems Lab, Khalifa University</b><br><i>Research Assistant</i>  | ABU DHABI, UAE     |
|                     | <ul style="list-style-type: none"> <li>• Developed a wide range of fiber optic sensors that cost a fraction of their electrical counterparts.</li> <li>• Came up with corrosion monitoring devices and software for oil and gas pipelines with potential to save the industry millions of dollars worth of maintenance costs.</li> <li>• Established a correlation between corrosion rate in pre-stressed structures and mechanical quantities such as strain (sensing principle).</li> <li>• Simulated photonic corrosion sensors in MATLAB and Abaqus to aid in sensor design and calibration.</li> <li>• Developed a novel accelerated corrosion testing setup based on electrochemical cells.</li> </ul>  |                    |
| AUG 2013 – DEC 2015 | <b>Khalifa University</b><br><i>Teaching Assistant</i>  | ABU DHABI, UAE     |
|                     | <ul style="list-style-type: none"> <li>• System dynamics and controls course – Conducted lab sessions and held office hours.</li> <li>• Computer aided design – Conducted computer lab sessions.</li> <li>• Lead the 1st national team of the United Arab Emirates to ever compete in the international Baja SAE competition (Maryland, 2015).</li> <li>• Mentored undergraduate students participating in the Abu Dhabi Solar Challenge (building and designing a solar-powered vehicle).</li> <li>• Co-mentored an undergraduate capstone project.</li> </ul>   |                    |
| AUG 2012 – MAY 2012 | <b>Yokogawa</b><br><i>Engineering intern</i>  | ABU DHABI, UAE     |
|                     | <ul style="list-style-type: none"> <li>• Wrote programs for industrial plant operation and control using distributed control systems.</li> <li>• Visited the main headquarters in Japan to represent the Abu Dhabi National Oil Company.</li> </ul>   |                    |

## AWARDS AND RECOGNITION

MAY 2019 – DEC 2021	<b>Doctoral Research award (B2X)</b> <i>Fonds de Recherche du Québec - Nature et Technologies</i>	56,000 CAD
JAN 2017 – DEC 2019	<b>McGill Engineering Doctoral Award (MEDA)</b> <i>McGill University</i>	96,000 CAD
AUG 2013 – DEC 2015	<b>ADNOC Graduate fellowship</b> <i>Abu Dhabi National Oil Company</i>	90,000 USD

---

Team leader of the first team to successfully qualify and complete the Baja SAE competition	KHALIFA UNIVERSITY, ABU DHABI, UAE
Awarded 2nd place in the Abu Dhabi Solar Challenge (10,000 AED)	KHALIFA UNIVERSITY, ABU DHABI, UAE
Recognition for voluntary commitment to the Graduate School's and the Graduate Student Affair's events	KHALIFA UNIVERSITY, ABU DHABI, UAE
Graduated Honors with distinction (2,000 AED)	KHALIFA UNIVERSITY, ABU DHABI, UAE
Made it to the Provost's list 3 times	KHALIFA UNIVERSITY, ABU DHABI, UAE

## PUBLICATIONS

### Submitted preprints

**K. Al Handawi** and M. Kokkolaras (2021). Optimization of infectious disease prevention and control policies using agent-based modeling. *IEEE Transactions on Emerging Topics in Computational Intelligence*, <https://www.gerad.ca/en/papers/G-2021-07>, (Under Review)  
*funded by an NSERC discovery grant*

**K. Al Handawi**, M. Panarotto, P. Andersson, O. Isaksson and M. Kokkolaras (2021). Optimization of design margins allocation when making use of additive remanufacturing. *Journal of Mechanical Design*, (Under Review)  
*funded partially by NSERC, FRQNT, CARIC and EU Horizon 2020 research and innovation programme*

### Refereed Journal Articles

M. Chehadeh, M. Wahbah, M. Awad, O. AbdulHay, **K. Al Handawi**, L. Seneviratne, I. Greatbatch and Y. Zweiri (2021). Novel aerial firefighting system for suppression of incipient cladding fires. *Journal of Field Robotics*, (In Press)  
*funded by Emaar Properties PJSC*

Corrosivity monitoring system using RFID-based sensors. in *Proceedings of SPIE Smart Structures/NDE, International Society for Optics and Photonics, Sensors and Smart Structures Technologies for Civil, Mechanical, and Aerospace Systems*, Las Vegas, USA, SPIE2016. doi: [10.1117/12.2218813](https://doi.org/10.1117/12.2218813)

## Poster presentations

---

**K. Al Handawi**, P. Andersson, O. Isaksson and M. Kokkolaras (2019). Scalable set-based design solutions for product remanufacturing. *International Conference on Engineering Design*, Delft, Netherlands, ICED19.

**K. Al Handawi**, L. Lawand, T. Hitchcox, Y. F. Zhao and M. Kokkolaras (2018). Additive manufacturing optimization and simulation platform for repairing and remanufacturing of aerospace components. *CRIAQ RDV Forum*, Montréal, Canada.

## COURSE WORK

---

- |                                    |  |
|------------------------------------|--|
| • Advanced mechanics of materials  | • Material engineering and corrosion   |
| • Engineering systems optimization | • Measurements and instrumentation     |
| • Continuum mechanics              | • Advanced vibrations                  |
| • Applied numerical methods        | • Fracture mechanics                   |
| • Applied finite element analysis  | • Viscous and compressible fluid flows |

## PERSONAL INTERESTS

---

- |  |  |
|--|--|
| • Gymnastics and calisthenics training | • 3d printing hobbyist   |
| • Powerlifting                         | • Car modding (muscle cars) and drag racing                            |
| • Competitive gaming                   | • Tinkering and taking apart any machine and putting it back together! |
